

TargetSolutions

SDRMA has partnered with **Vector Solutions** - the U.S. leader in online, enterprise risk management solutions for public entities - to deliver a web-based training and risk management platform to all SDRMA members. This platform, known as **Vector Solutions**, is used by 2,500 public entities nationwide. It features:

- An extensive library of courses and training management services. To view, [download the Course List](#)
- Flexible tools to monitor key compliance tasks
- Easy-to-use communication solutions for exchanging information
- Powerful risk identification and mitigation technologies

In addition, as an SDRMA member, your organization has the ability to lower its property/liability, auto and general liability premiums by using the platform. In fact, you can receive discounts on your Workers' Compensation and Property/Liability contributions when your employees and board members complete a designated number of courses.

Built specifically for public entity organizations, the Vector Solutions Platform features all the tools you need to:

Cost-effectively train your employees with more than 1,000 hours of targeted, self-paced, online training

- Streamline communication across your organization
- Simplify recordkeeping and ensure compliance
- Improve management decision making with detailed reporting and analytical tools

As a new and existing SDRMA member, you have access to **Vector Solutions** on their website at www.TargetSolutions.com.
